NON-WSQ COURSEWARE

AI for Product Development

Lesson Plan

Course Code	**C840**
Version	**v1.0**
Release Date	1 October 2026
Training Provider	Tertiary Infotech Academy Pte. Ltd. (UEN 201200696W)
Trainer	Dr Alfred Ang

Controlled document. Verify the version before use.

1. Course and Delivery Information

Course	AI for Product Development
Course code	C840
Duration	2 days / 15 instructional hours (9:30am – 5:30pm daily, one 30-minute lunch)
Delivery mode	Facilitated classroom or synchronous learning with an approved agentic AI builder
Required resources	199-slide deck, Learner Guide, twelve activity folders, spreadsheet/JSON viewer and an approved agentic AI builder

2. Learning Outcomes

- LO1 Evaluate agentic AI builders for product research and development, comparing strengths, limitations, resources and skills.
- LO2 Apply optimisation techniques to improve the efficiency, quality and control of agentic product-development workflows.
- LO3 Evaluate the benefits and trade-offs of deploying agentic AI-powered product solutions and recommend a governed path forward.

3. Facilitation Principles

- Use the PPT for mechanism visualisation, technical dialogue and evidence interpretation; do not demonstrate click-by-click procedures from the slides.
- Use the Learner Guide and activity PDFs for detailed procedures, prompts, troubleshooting and acceptance checks.
- Keep live customer data, external publishing and irreversible actions outside learner scope unless the trainer stages a safe simulation.
- Require observable execution evidence before accepting an agent response or learner conclusion.

4. Day 1 Detailed Schedule · 9:30am – 5:30pm

Time	Topic / activity	Method	Resources	Evidence / outcome
09:30–10:00	Welcome, introductions, context, LMS access and course outline	Facilitated briefing	Slides 1–10	Learner context and materials access
10:00–11:25	Topic 1: product opportunity, JTBD and research-agent evidence	Mechanism dialogue + worked examples	Slides 11–34	Opportunity brief and claim ledger
11:25–13:15	Topic 1: builder comparison, readiness and build-buy-partner decisions	Technical explanation + critique	Slides 35–71	Weighted matrix and readiness heatmap
13:15–13:45	Lunch	—	—	—
13:45–15:10	Activities 01–03: opportunity, builder comparison and evidence pack	Guided activity; individual evidence	Activity 01–03 folders + LG §5.1–5.3	Opportunity brief, comparison and claim ledger
15:10–16:50	Topic 2: product context, agent roles, handoffs and	Mechanism dialogue + technical demonstration	Slides 72–107	Workflow canvas and evaluation contract

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Time	Topic / activity	Method	Resources	Evidence / outcome
	evaluation sets			
16:50–17:30	Activities 04–06: persona, workflow canvas and AI-ready PRD	Guided setup + facilitated debrief	Activity 04–06 folders + Topic 2 checkpoint	Persona/JTBD map, handoff contract and PRD

5. Day 2 Detailed Schedule · 9:30am – 5:30pm

Time	Topic / activity	Method	Resources	Evidence / outcome
09:30–10:45	Activities 07–08: prompt evaluation set and prototype experiment	Guided activity; verifier-led evidence	Activity 07–08 folders	Frozen evaluation set and experiment ledger
10:45–12:40	Topic 3: deployment posture, architecture, security and observability	Mechanism dialogue + technical demonstration	Slides 133–163	Deployment decision and control rationale
12:40–13:10	Lunch	—	—	—
13:10–15:00	Activities 09–10: deployment and risk-control review	Guided activity; individual verification	Activity 09–10 folders + LG §5.9–5.10	Reference architecture and risk register
15:00–16:15	Topic 3: KPI feedback, rollout and risk-adjusted recommendation	Evidence analysis + worked comparison	Slides 164–193	Monitoring scorecard and rollout gate
16:15–17:30	Activities 11–12: KPI dashboard and executive recommendation; course close and feedback	Individual capstone + decision review	Activity 11–12 folders + LG §5.11–5.12; Slides 194–199	KPI tree, bounded recommendation and course feedback

6. Trainer Preparation Checklist

- Confirm the course identity, version and 199-slide deck before class.
- Verify that every activity folder contains README/PDF, brief.yaml, prompt, mock data, solution, verifier and evidence checklist.
- Use a learner-safe agentic AI environment; keep live data, unapproved integrations and external publishing out of scope.
- Test LMS access without exposing credentials on projected screens.
